What is A.I.?

Why is it important?

Where should I start?

Course Overview

Purpose

To learn about artificial intelligence
from a high-level perspective

Overview

Artificial Intelligence

History of A.I.

Modern A.I.

A.I. and I.T.

Future of A.I.

Audience

Software developers

IT professionals

Executives and managers

Prerequisites

No prerequisite courses

No programming knowledge

No software required

Learning Outcome

You will understand the basics of artificial intelligence.
