What is Microsoft Copilot?

Microsoft Copilot is the name of the suite of Microsoft's Artificial Intelligence (AI) assistants

Multiple Microsoft Copilot products

- Copilot on the Web (Microsoft Copilot)
- Microsoft Copilot for Microsoft 365
- Microsoft Copilot in Windows
- Microsoft Copilot for Sales
- Microsoft Copilot for Service
- Microsoft Copilot for Power Platform

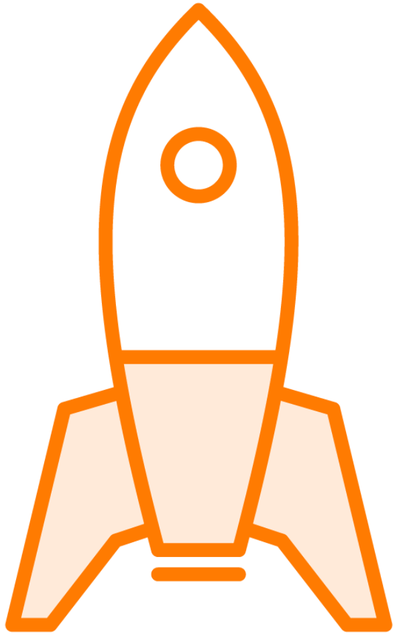
While they are all in the same suite – each Copilot has a different purpose and capability

Goals of Copilot for Power Platform

Make it easier for makers to create apps, flows, websites and reports

Make it easier for makers to add AI functionality to their apps, flows, websites and reports

Make It Easier for Makers to Create in the Power Platform



The Microsoft Power Platform is aimed at anyone from

- Business users with no experience in IT
- Developers who create complex applications

It can be challenging for beginners with no training at all to get started

- Copilot is there to help!

In addition to being more satisfied and faster, makers using Copilot have a success rate 60% higher than those who don’t incorporate Copilot.

Infusing AI in Your Applications

You can add Copilot components to your applications

- An AI assistant that the users of your app can use

Traditionally this has been very difficult ($)

- With Copilot you can do it with just a drag and drop

Copilot in Power Platform Licensing

Copilot licensing depends on the product

Power Apps and Power Automate

- No additional charge for all the features you have

Power BI requires a premium license

- F64 and higher
- P1 and higher
