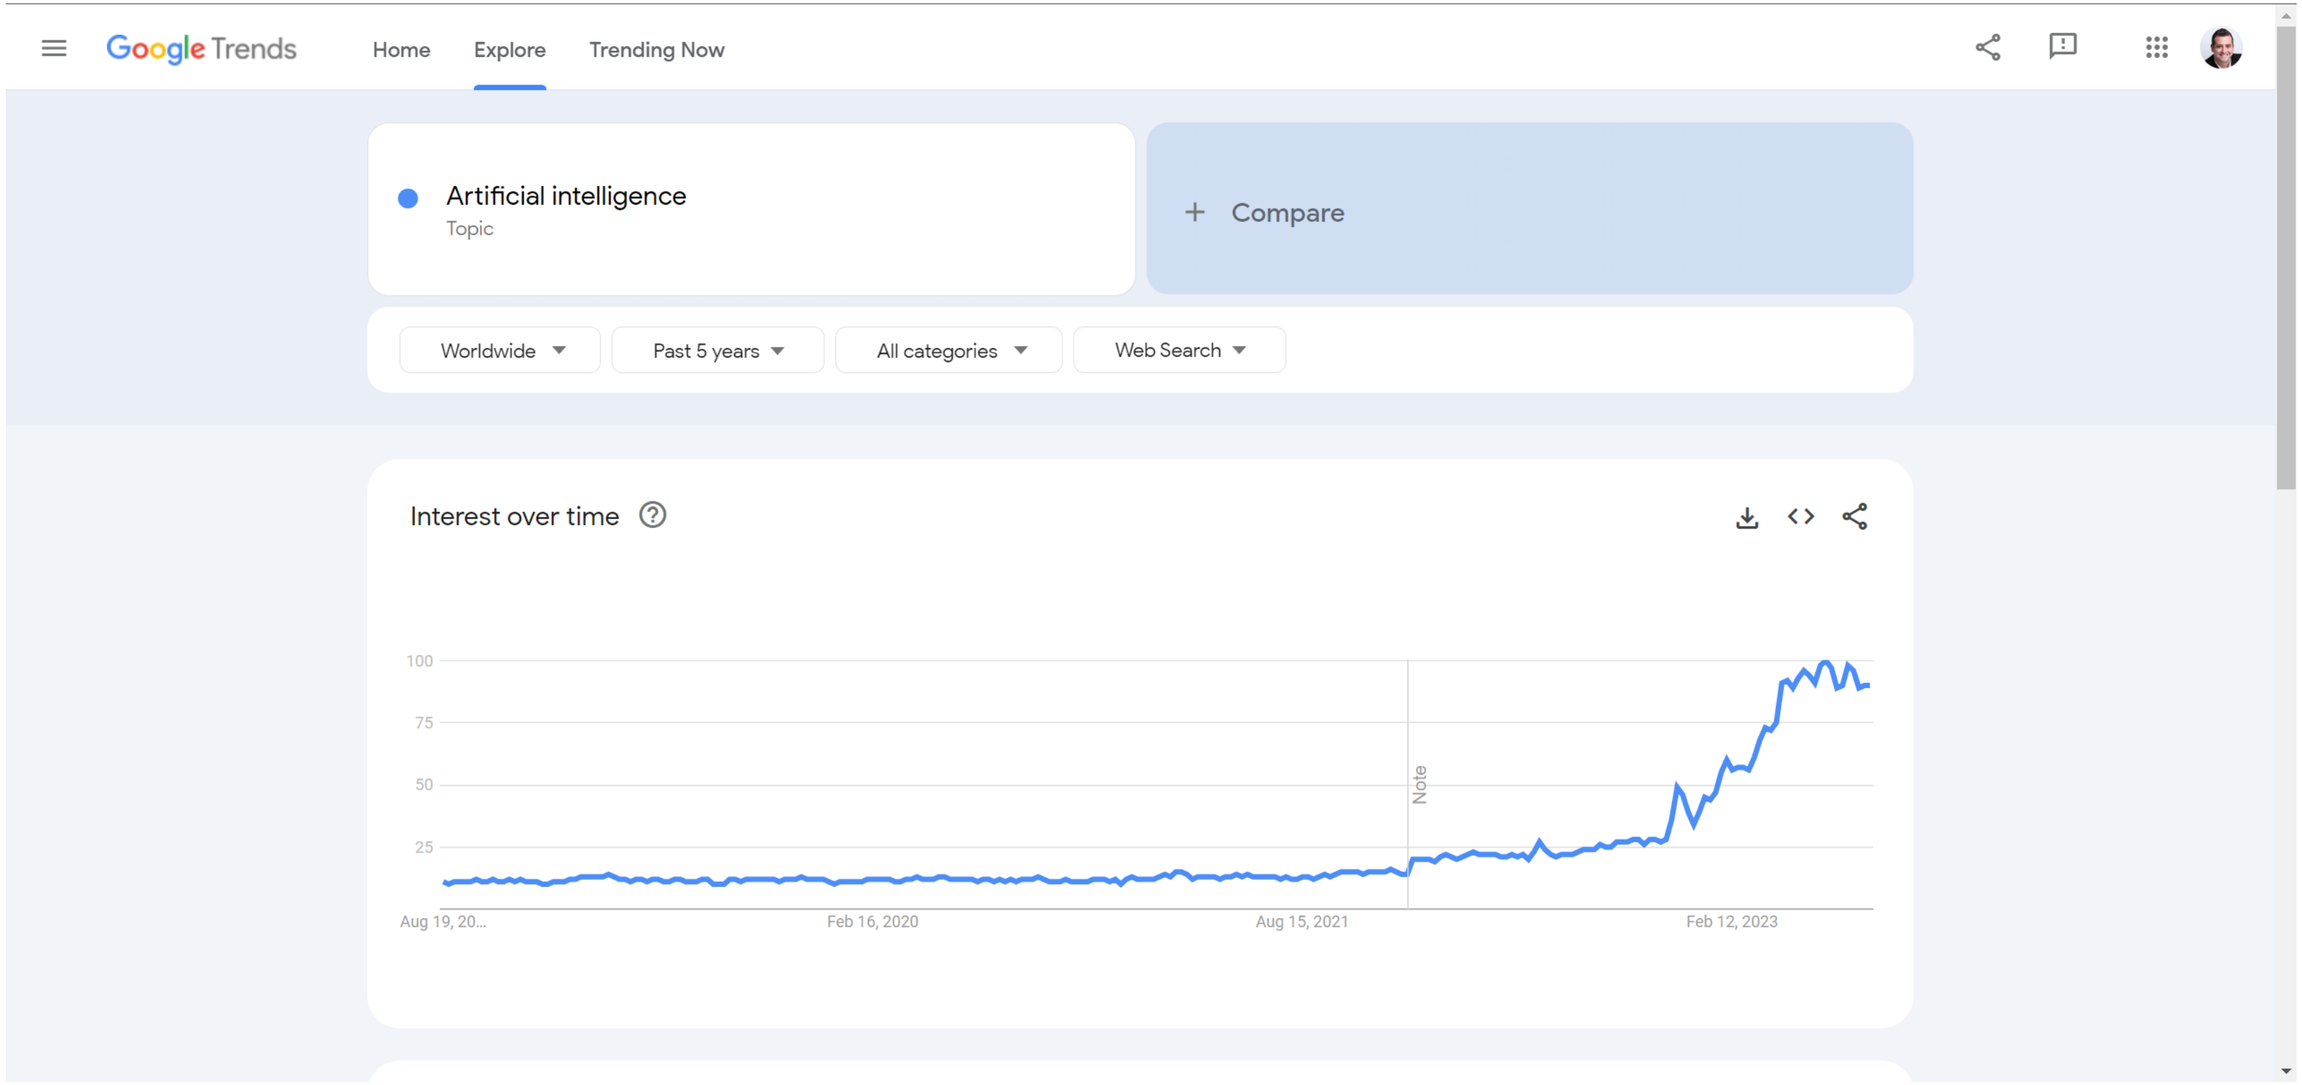
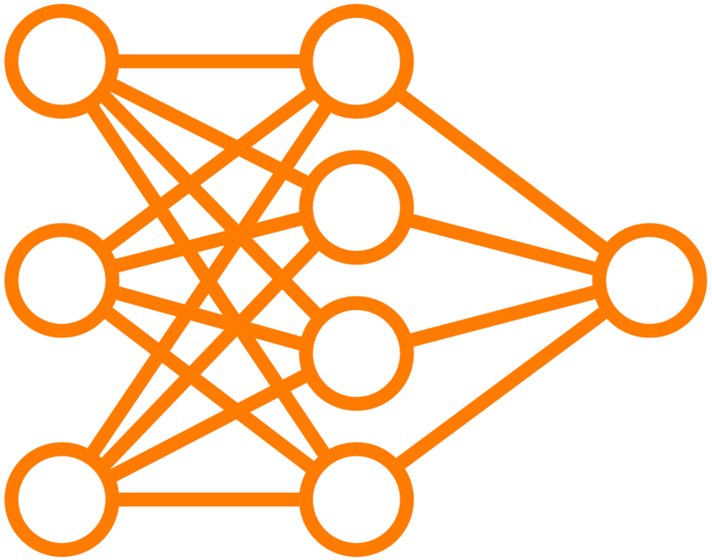
Artificial Intelligence Growth in Popularity



ChatGPT



ChatGPT launched in November 2022 and is one of the most popular AI tools

- Stands for Chat Generative Pre-trained Transformer

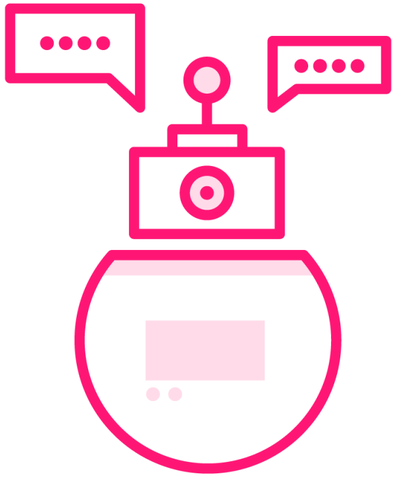
Enables users to interact with a chatbot and ask it anything

- Questions
- Create stories
- And more!

ChatGPT is built on a large language model (LLM) called GPT-3.5

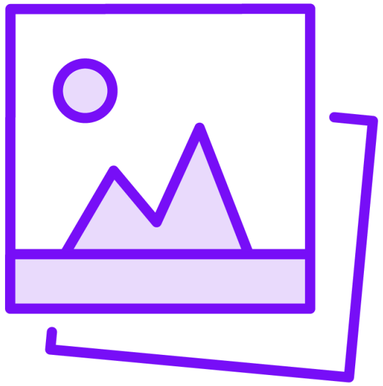
- Created by an organization called OpenAI

Huge Growth in AI Tools Available for Productivity



ChatGPT
Google Bard
Bing Chat

Jasper
Copy AI
Writesonic



Adobe Firefly
DALL-E

GitHub Copilot
AlphaCode

Microsoft and Artificial Intelligence

Microsoft has a long history of artificial intelligence-based products

- Consumer services
  - Clippy
  - Cortana
- Enterprise services
  - AI Builder
  - Microsoft Syntex
  - Microsoft Cognitive Services in Azure
    - Now called Azure AI Services

Microsoft and OpenAI

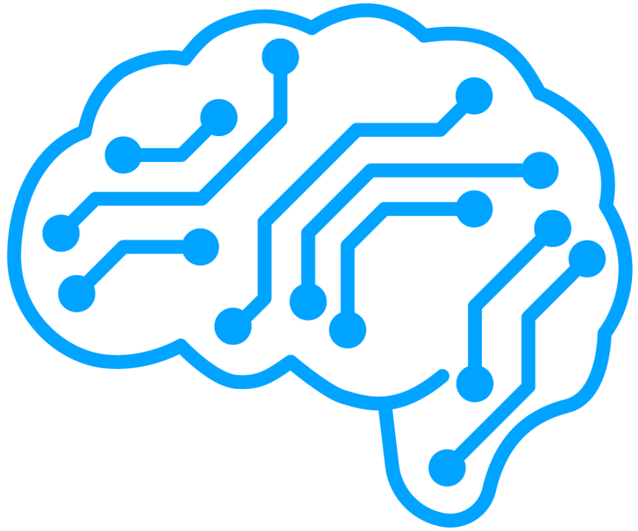
Microsoft has invested in OpenAI since 2019

- OpenAI is the company behind ChatGPT
- Exact amount hasn't been disclosed but it's a multiyear, multibillion dollar investment
  - News outlets report 1B in 2019 and 2021, and 10B in 2023

Microsoft Azure is OpenAI's exclusive cloud provider

Microsoft will bring OpenAI's models throughout their consumer and enterprise services

Microsoft’s AI Solutions



Microsoft has AI services and solutions for both consumers and enterprises

Consumer and enterprise solutions might be very similar in functionality

- Enterprise solutions offer commercial data protection
  - Information exchange won’t be used to train AI models or end up on the web

Copilot Suite of Products

- Copilot in Windows
- Copilot in Microsoft 365 and Microsoft Viva
- Copilot in Dynamics 365
- Copilot in the Power Platform
- Microsoft Security Copilot
- GitHub Copilot

Bing Chat vs. Bing Chat Enterprise vs. Microsoft 365 Copilot

Bing Chat	Bing Chat Enterprise	Microsoft 365 Copilot
AI Powered Chatbot	AI Powered Chatbot	AI Powered Solution
Uses GPT-4 LLM by Open AI	Uses GPT-4 LLM by Open AI	Uses GPT-4 LLM by Open AI
Free with a Microsoft Account	Commercial data protection	Commercial data protection
	Included with select Microsoft 365 licenses	Connects to your data in the Microsoft Graph
		Add-on license

Copilot Licensing

There is no global Copilot license for all the different Copilots

- Copilot licensing will depend on the product

Microsoft did not announce licensing plans for all Copilots yet

- Microsoft usually announces it after previews are done

Licensing always changes

- Make sure to always check with your licensing professional

Getting Your Environment AI Ready

- Just enough access
- Bring your data in the Microsoft Graph
- Apply metadata to your data
- Make sure your user profiles are complete
- Use the Semantic Index for Copilot
- Start planning for your licenses

Recommended Courses to Optimize Your Environment

- Configuring and Managing SharePoint Online and OneDrive for Business
- Getting Started with Microsoft Teams and Microsoft 365 Groups Administration
- Configuring Governance and Compliance for Microsoft Teams and Microsoft 365 Groups
- Managing Microsoft Search
