Overview

Copilot in Microsoft Loop

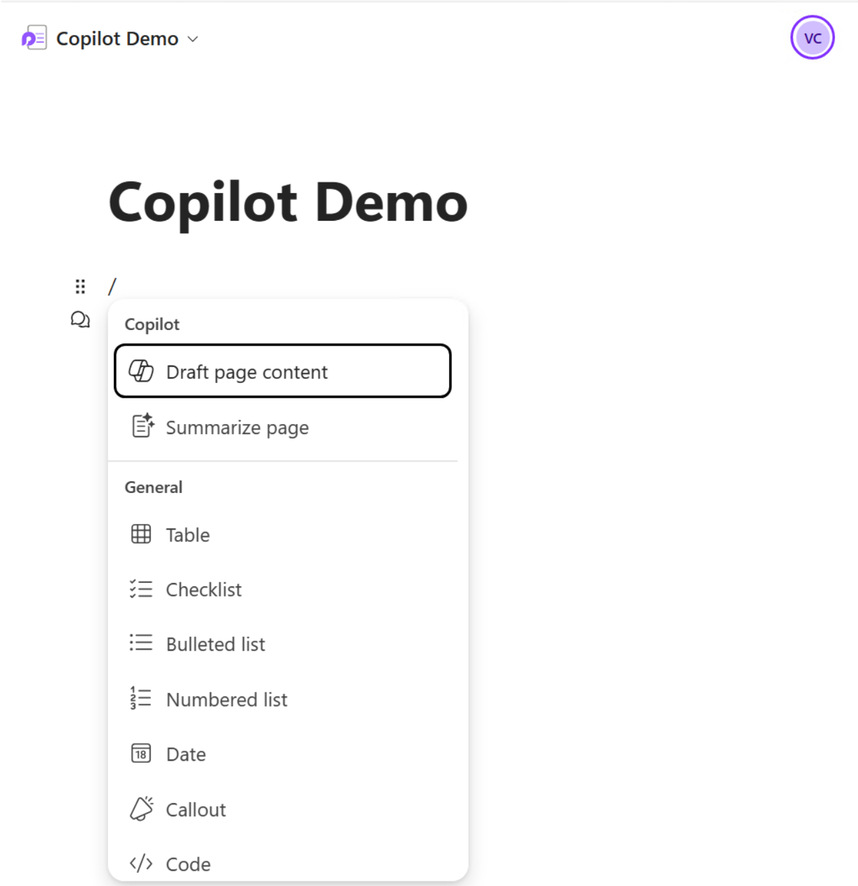
- Draft and rewrite content
- Summarize a Loop page
- Recap changes

Copilot in Whiteboard

- Suggest content
- Summarize a whiteboard
- Organize ideas

Copilot in Microsoft Loop

Accessing Copilot in Loop



Only requirement is that Loop is enabled for your tenant

Access Copilot in Loop by typing / and then you will have the option to

- Draft page content
- Summarize the page

Drafting with Copilot in Loop is not grounded on the surrounding page / linked content

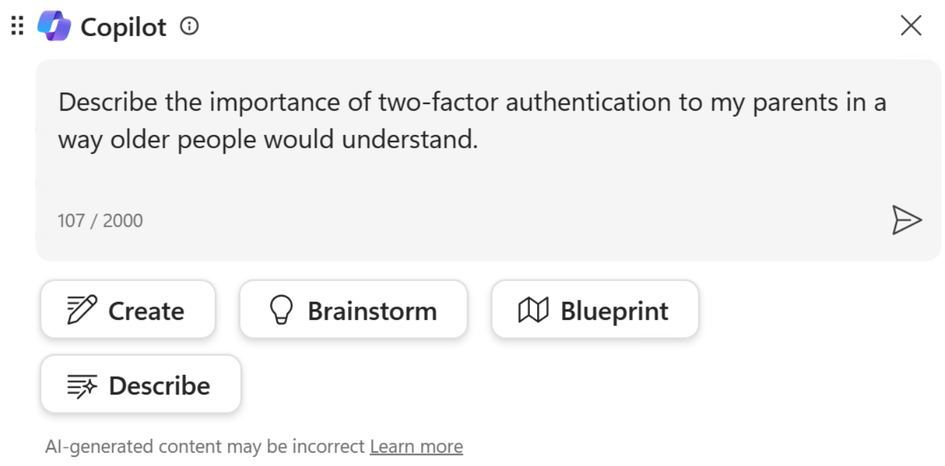
- At the time of recording this course

Use Copilot to Draft and Rewrite Content

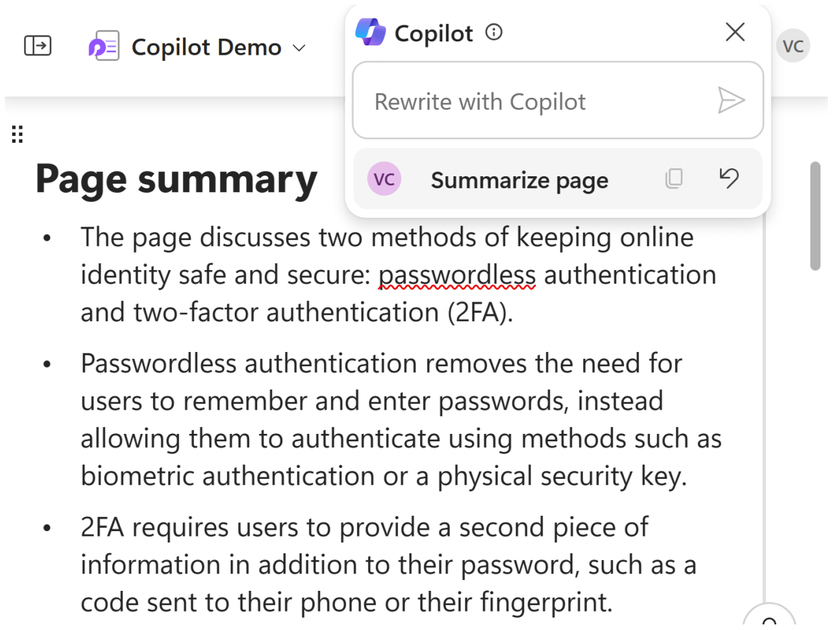
Use Copilot to create content

- Create a paragraph, business plan, template
- Describe a topic
- Brainstorm ideas
- Blueprint a plan
- Write code

You can also use Copilot to rewrite content to improve it or make it a different tone



Use Copilot to Summarize Content



Use Copilot to summarize the content of a page

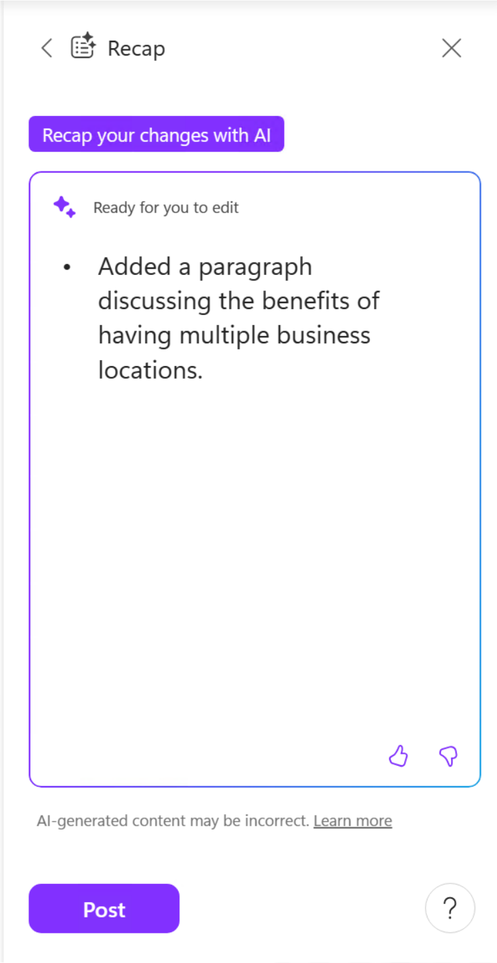
You can insert it at the top of the page as an executive summary

Use Copilot to Recap Changes

Copilot in Loop can make a recap of changes you made to a Loop page

Allows other users to quickly see changes made in the Loop page

You can also mention other people to notify them of the recap



Demo

Copilot in Loop

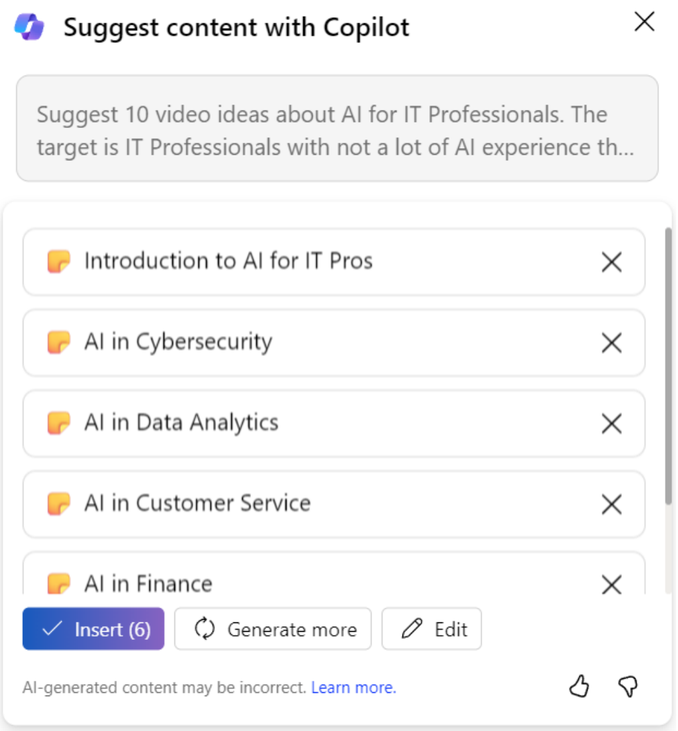
Copilot in Whiteboard

Requirements

Whiteboard is an online only experience

Only requirement is that Whiteboard is enabled inside your tenant

Use Copilot to Suggest Content



Copilot can suggest content based on a prompt

- Will suggest six items to start - you can generate more

Make sure you craft a detailed prompt for the best results

Use Copilot to Summarize a Whiteboard

You can use Copilot to summarize a whiteboard

Summary will be created as a Loop component

- Share the Loop component with others later
- Also includes a link to the original whiteboard

Marketing Optimization Meeting ! Just now

Participant: Vlad Catrinescu, Vanessa Le, John Smith

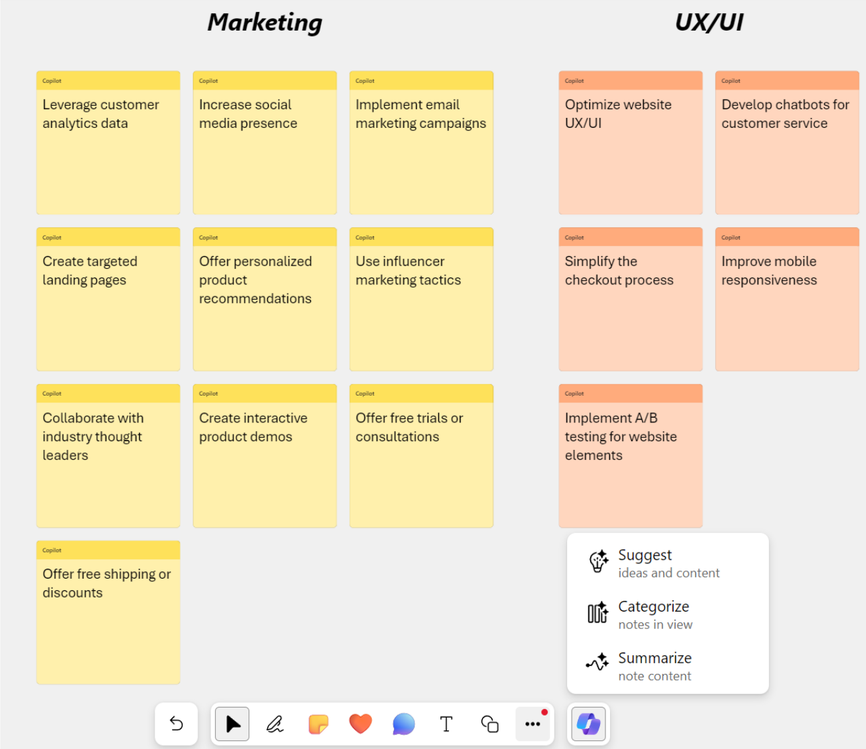
Date: Thursday, January 25

18 ideas generated.

Main Themes of the Whiteboarding Session:

- **Marketing**: The team explored increasing social media presence, implementing email marketing campaigns, and using influencer marketing tactics.
- **Website Optimization**: The team experimented with optimizing website UX/UI, improving mobile responsiveness, simplifying the checkout process, and implementing A/B testing for website elements.
- **Customer Experience**: The team considered leveraging customer analytics data, offering personalized product recommendations, developing chatbots for customer service, and leveraging AI for product recommendations.
- **Promotions and Programs**: The team mapped out offering free trials or consultations, free shipping or discounts, developing a loyalty rewards program, and creating a referral program.

Use Copilot to Organize Ideas



Copilot can categorize notes for you

- With a single click

Automatically groups similar idea together under descriptive headings
