Copilot in Microsoft Outlook in Action

Summarize E-mails

Copilot in Outlook can help you quickly get caught up on your email.

Summarize E-mail Threads

Summary by Copilot will show up at the top of the e-mail thread

It can summarize the full thread of e-mails

Project Alpha Requirements

Summary by Copilot Preview

Vanessa Le wants to discuss the requirements and cost of Project Alpha, the new company Intranet on SharePoint Online.

They would like to have discovery meetings in mid-February and art of the possible workshops on what an Intranet on SharePoint can look like.

They want to start integrating external systems with Graph Connectors, especially file shares before migrating them in June 2024.

John Smith, the creative director, will share the brand guidelines, with the expectation of seeing the homepage in March and the rest of the layouts in April, with a hopeful delivery in July.

They request that you send them the project plan based on these requirements.

Hello Vlad,

I wanted to start this e-mail thread so we can discuss the requirements, as well as cost of project Alpha, the nickname for our new company Intranet on SharePoint Online. We would like to start with a few discovery meetings in the middle of February, as well as maybe schedule some art of the possible workshops on what an Intranet on SharePoint can look like. I would also like to get started as soon as possible on integrating all of our external systems with the Graph Connectors , especially our file shares before we migrate them in June 2024.

I cc'd @John Smith who is our creative director and will be able to share with you our brand guidelines, we would expect to see the homepage in March, and the rest of the layouts in April as we advance with mockups , and are hopeful for a July delivery on the whole project.

Please send us the project plan you build based on those requirements,

Thanks,
