Using Copilot in Cloud Flows

Copilot Features in Cloud Flows

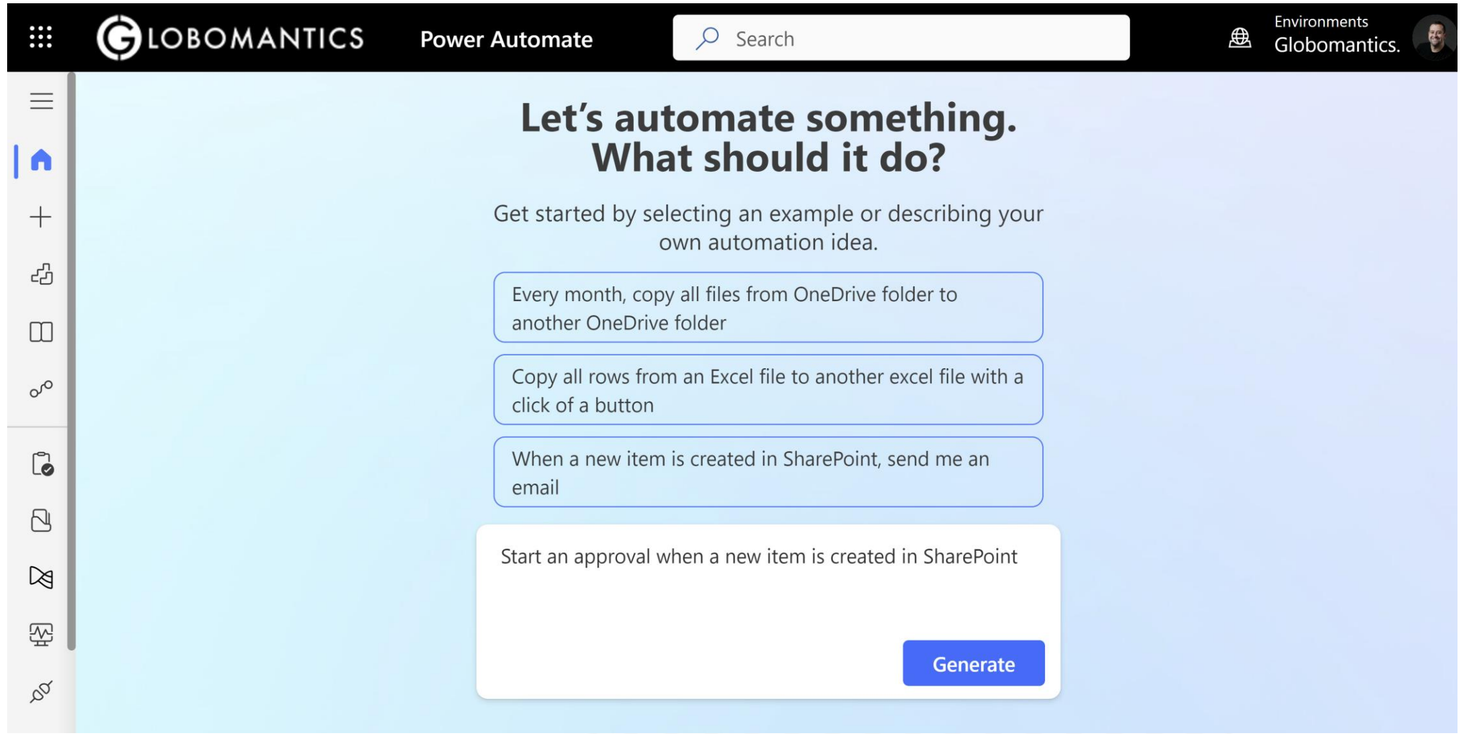
Create cloud flows

Modify cloud flows

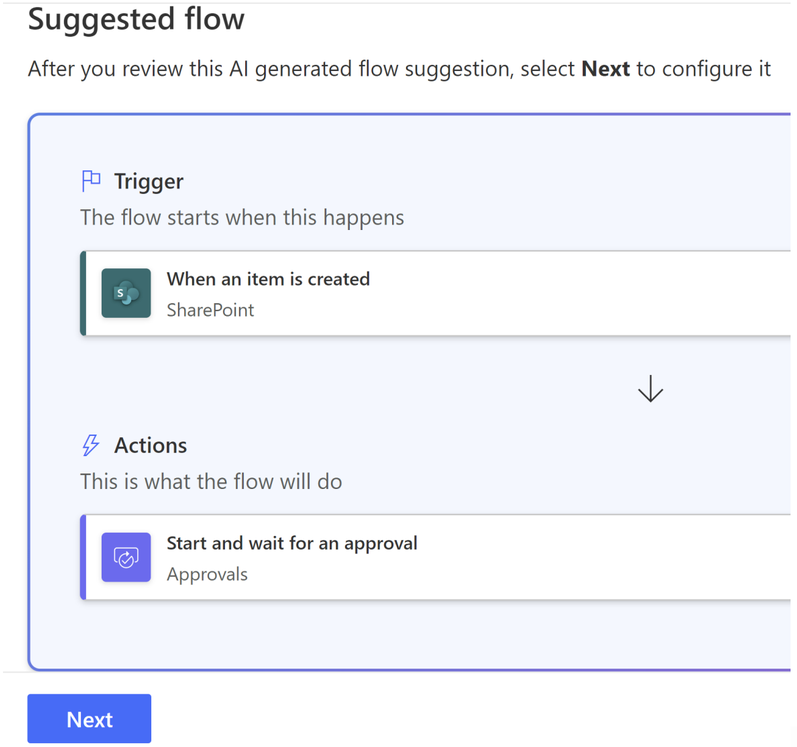
Ask questions about the flow

Copilot is on the front page of the Power Automate maker portal

Just tell it what you want to build!



Copilot Suggested Flow

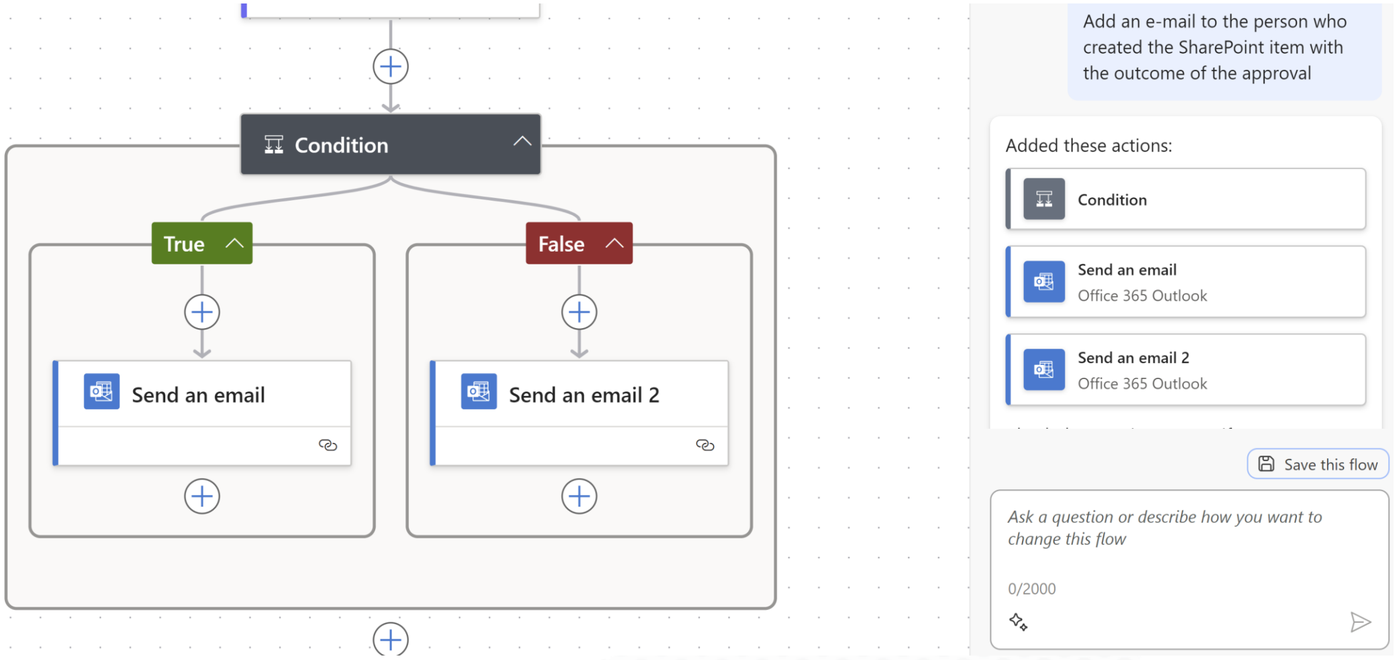


Copilot will suggest a flow for you

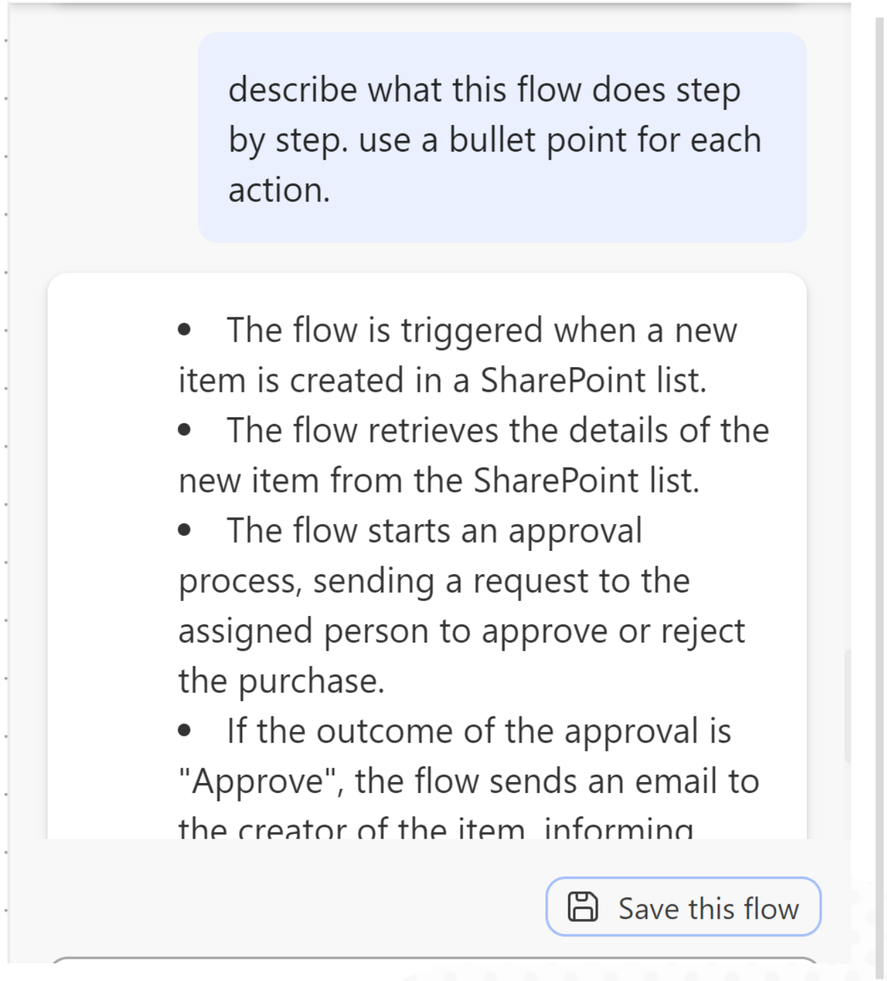
You can review the suggested flow and

- Accept it
- Ask for a different suggestion

Keep asking Copilot to make changes!



Ask Questions



Ask Copilot questions about your flow

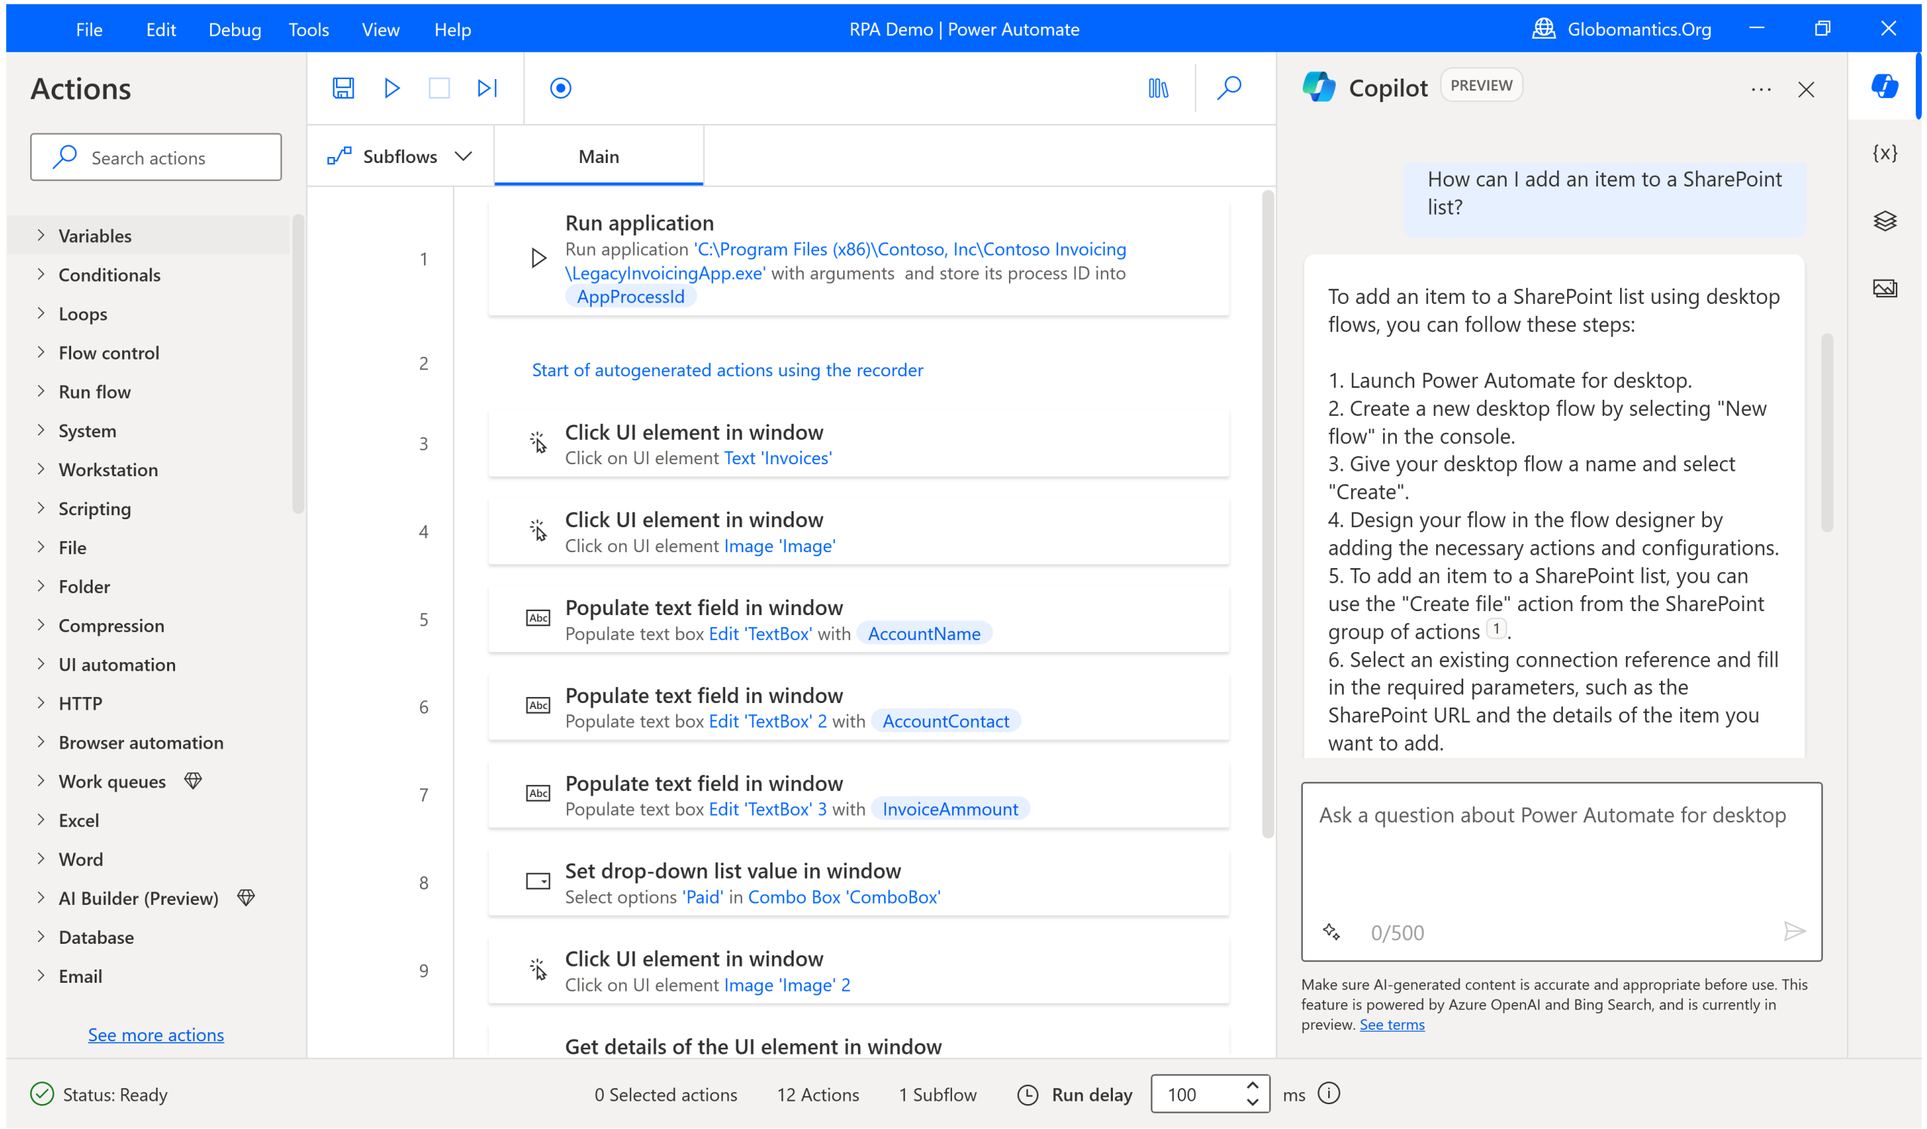
- You can even ask it to document your flow!

Demo

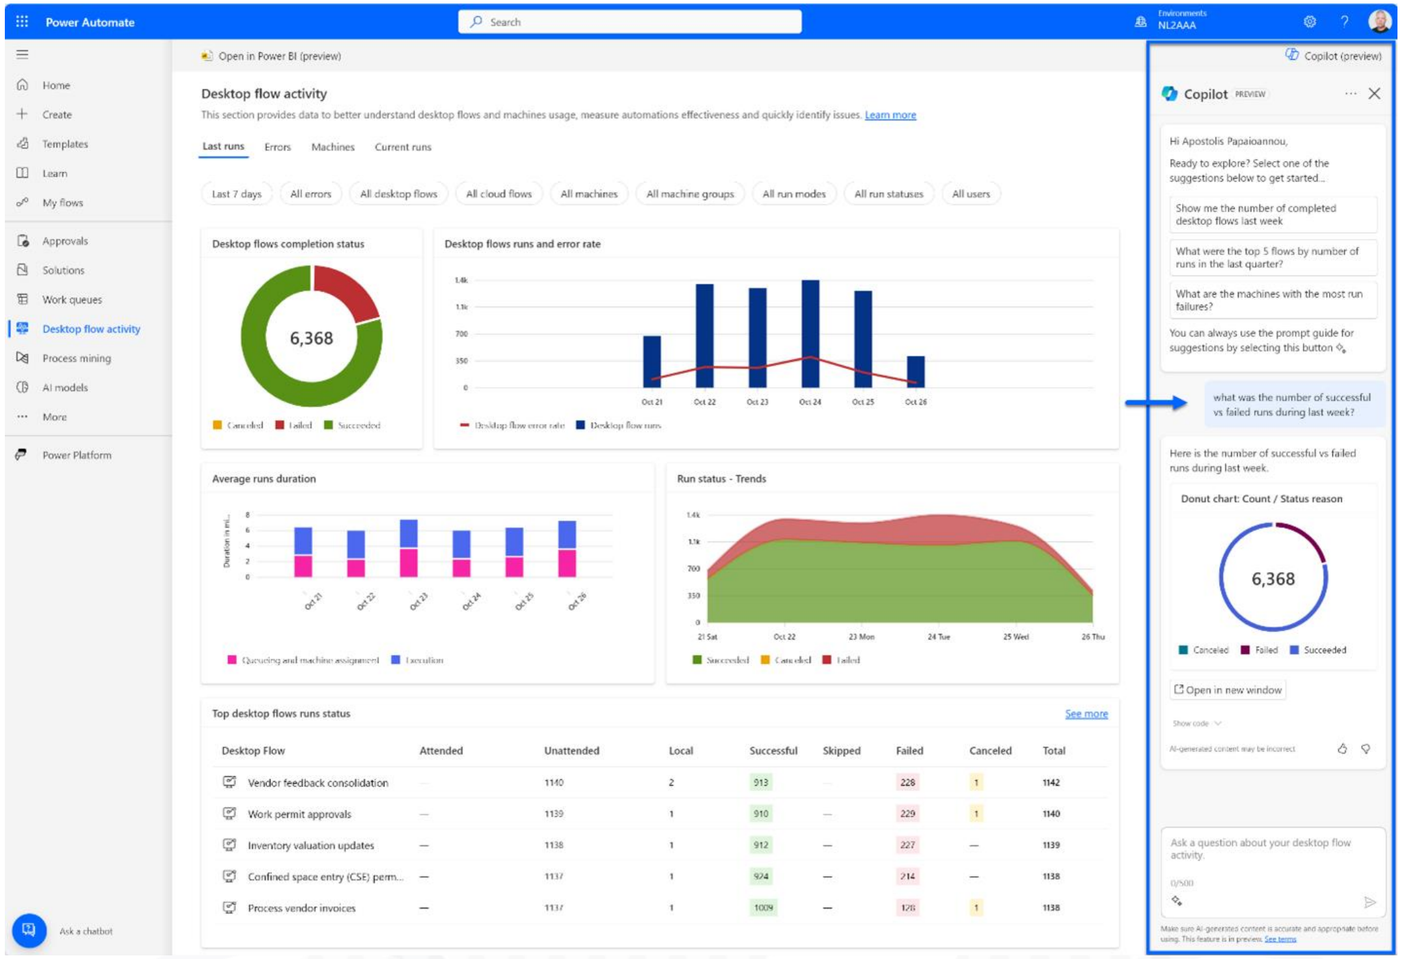
Copilot in cloud flows in action

Using Copilot in Desktop Flows

Your AI Assistant in Desktop Flows



Use Copilot to analyze automation activity



Sample Prompts

Show me the most frequent run errors during last month

Show me the top failed flows by number of runs together with their owner info

Which machines had the most run failures today?

Demo

Copilot in desktop flows

Using Copilot in Process Mining

Process Mining in Power Automate

The process mining capability in Power Automate works with the existing Microsoft platform and ecosystem to provide end-to-end solutions and enable faster business decisions. By extracting event data from your system of records, it visualizes the processes happening in your organization, allowing you to customize your process mining reports, compare processes, determine the root cause of inefficiencies, and monitor KPIs.
