What is Microsoft Copilot?

Microsoft Copilot is the name of the suite of Microsoft's Artificial Intelligence (AI) assistants

Multiple Microsoft Copilot products

- Copilot on the Web (Microsoft Copilot)
- Microsoft Copilot for Microsoft 365
- Microsoft Copilot in Windows
- Microsoft Copilot for Sales
- Microsoft Copilot for Service
- Microsoft Copilot for Power Platform

Goals of Copilot for Power Platform

Make it easier for makers to create apps, flows, websites and reports

Make it easier for makers to add AI functionality to their apps, flows, websites and reports

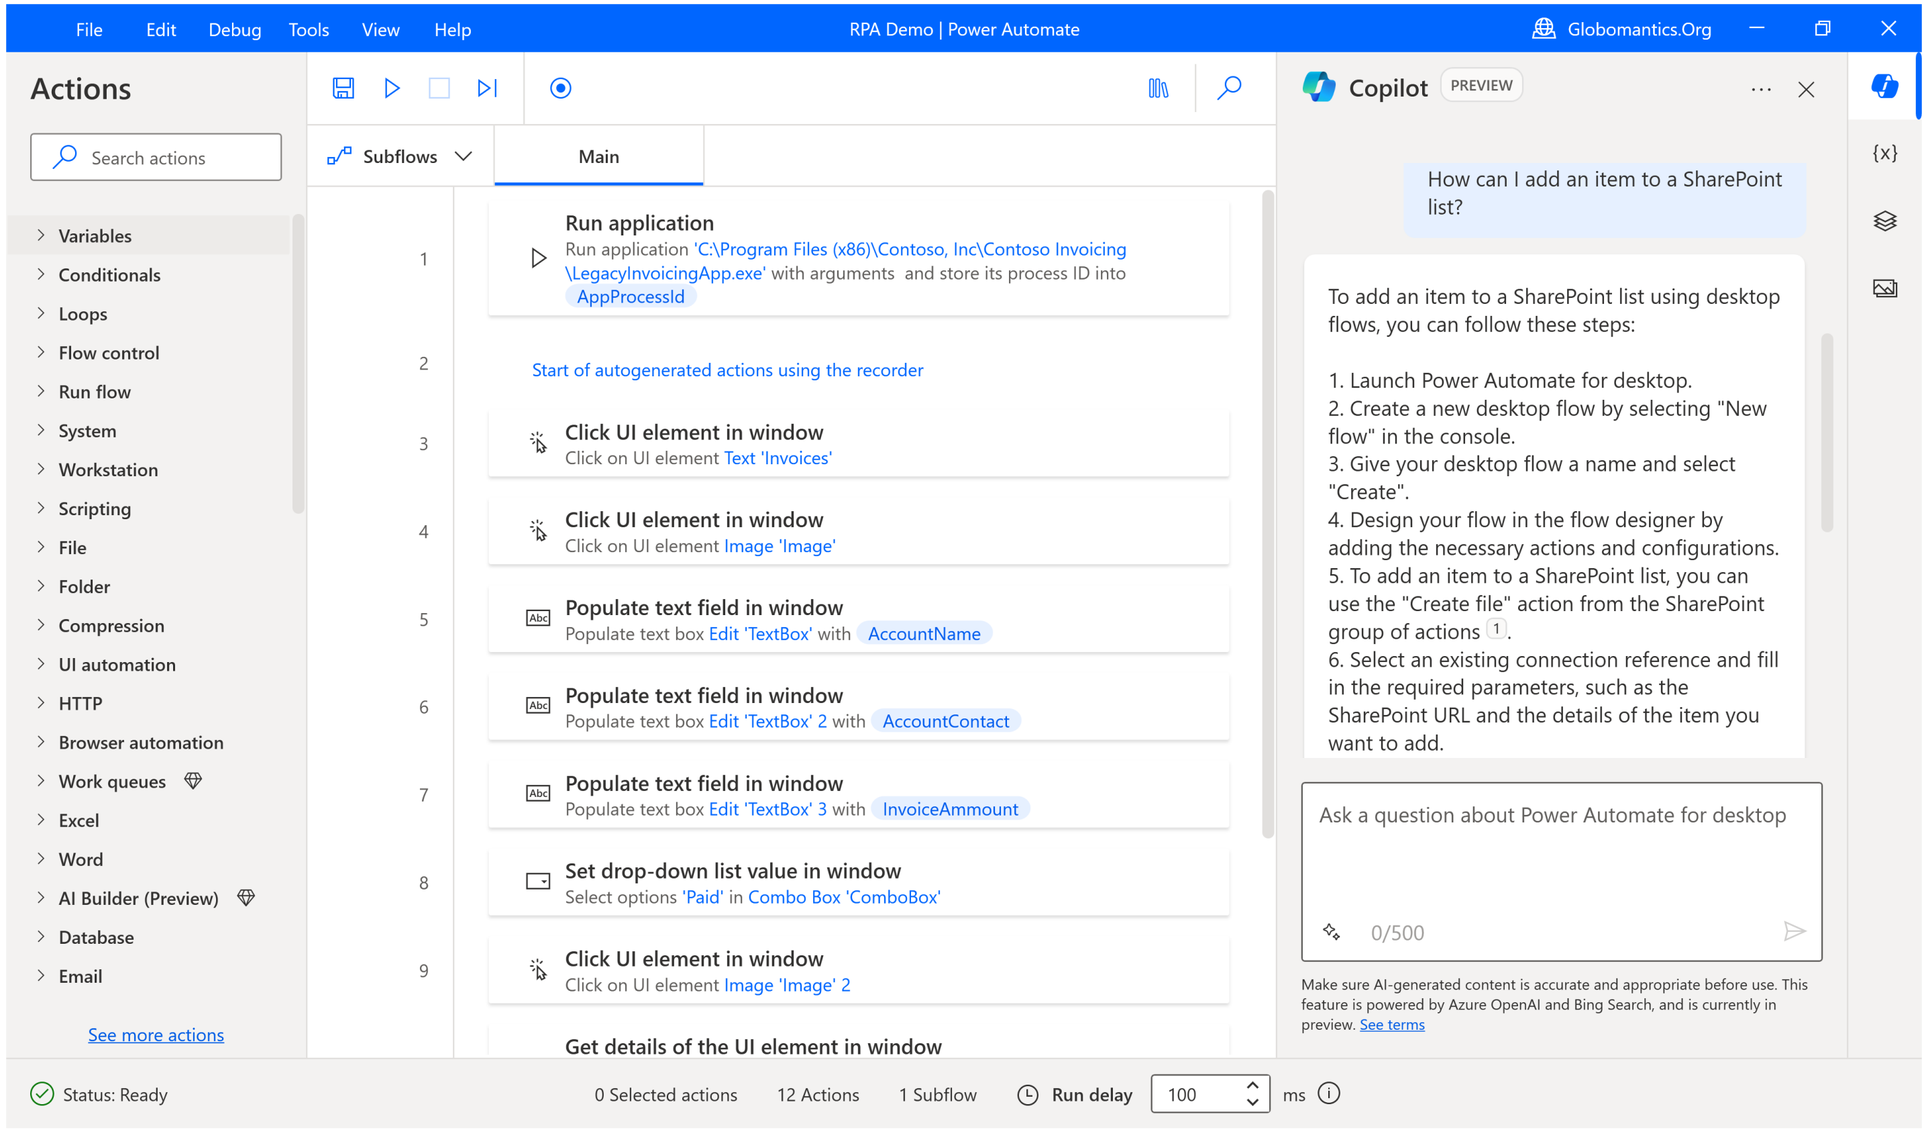
Copilot Features in Power Automate Cloud Flows

Create cloud flows

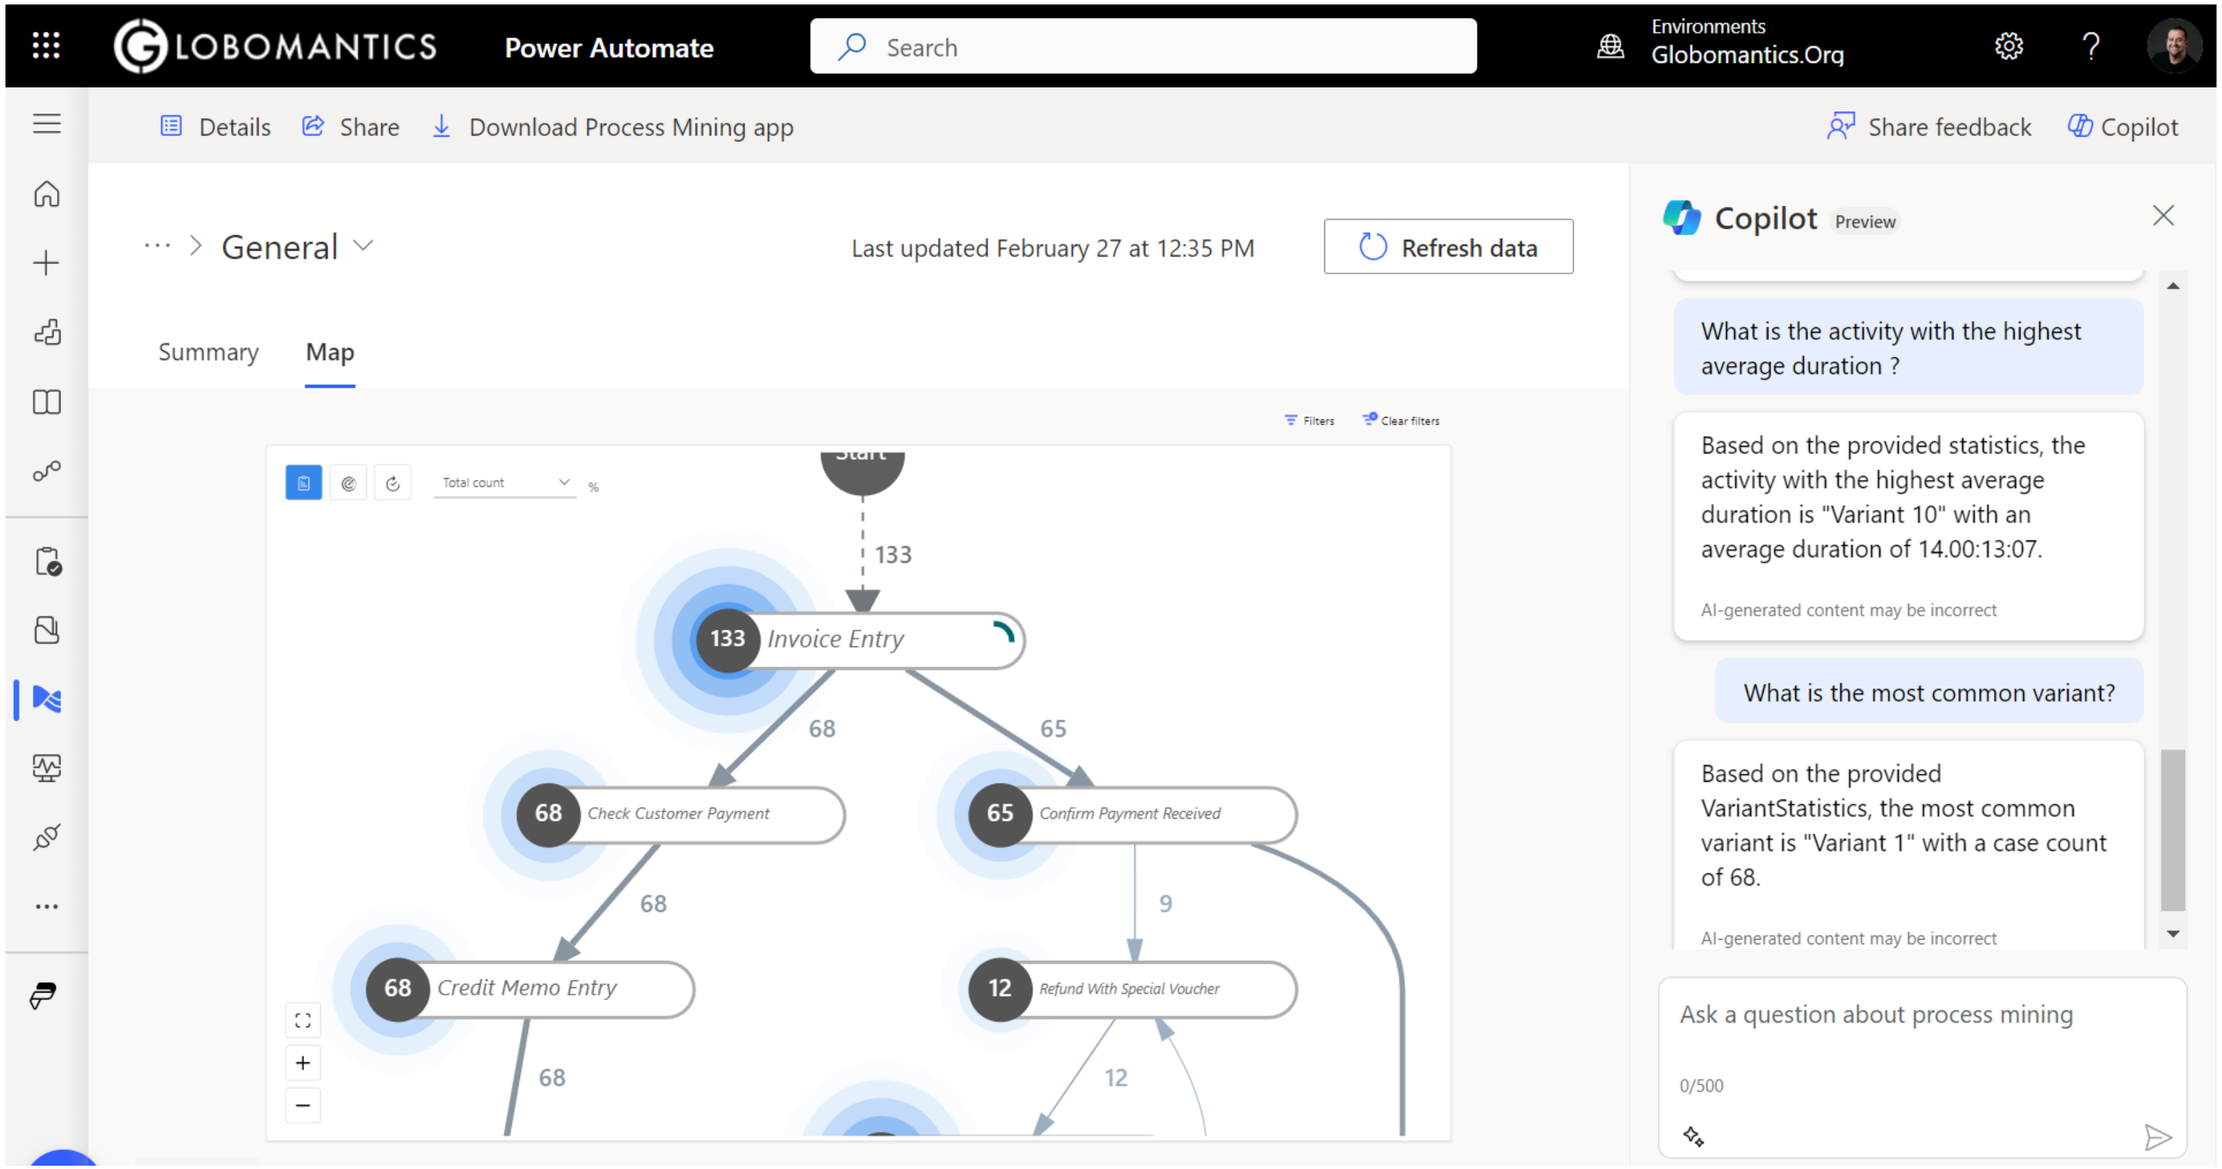
Modify cloud flows

Ask questions about the flow

Copilot is Your AI Assistant in Desktop Flows



Copilot in Power Automate Process Mining



Copilot Features in Power Apps Canvas Apps

Create your canvas app and Dataverse table

Help you customize your app

Add a Copilot to your canvas app

Copilot in Model-driven Power Apps

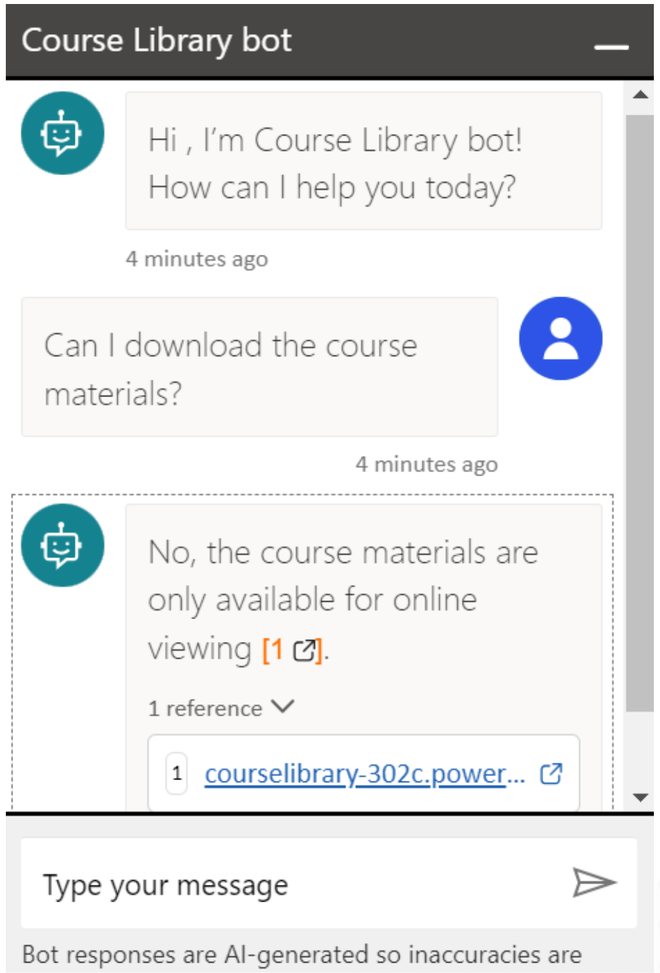
- Summarize a report page
- Enhance Q&A
- Create measure descriptions
- Write DAX expressions

Copilot Site Building Features in Power Pages

- Create an AI-generated site
- Create an AI-generated webpage
- Add an AI-generated form
- Add an AI-generated multistep form
- Add AI-generated text

Add an AI-powered Chatbot to Your Website



Add a chatbot to your website

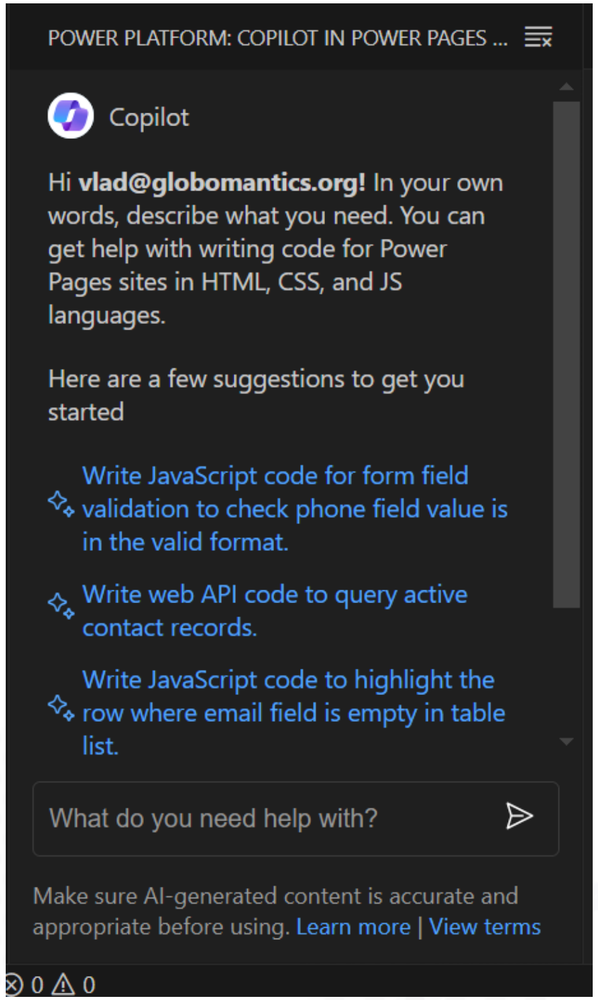
- Based on the content of your site

Choose which Dataverse tables and columns your chatbot will use to create answers

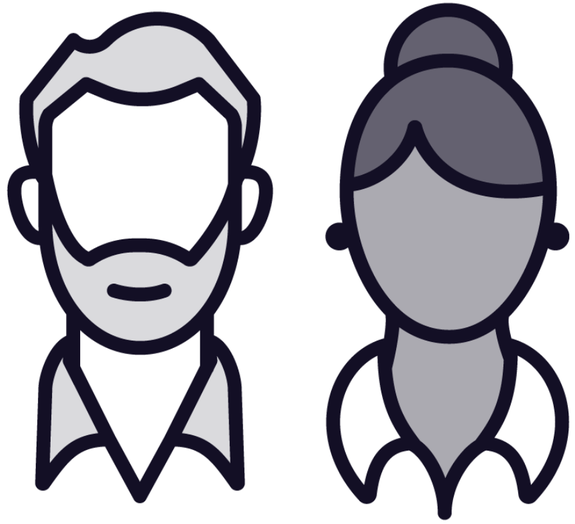
Add AI-Generated Code Using Copilot

Copilot available when you open your website in Visual Studio Code

Ask Copilot to help you write HTML, CSS, or JavaScript for your website



Copilot Cannot Replace Your Skills



Copilot is amazing!

- But it's not perfect

You still need knowledge of the different Power Platform products

- Copilot will amplify your skills and make you more productive!

Lots of content on Pluralsight for each product!

Microsoft Copilot Content on Pluralsight

Learn about the other Microsoft Copilot products on Pluralsight
